HO TAN THANH

.NET Fullstack Developer · Healthcare Software Specialist

CAREER OBJECTIVE

- **Short-term Goal**

Focus on delivering quality work and building software products that bring real value. Continuously improve technical skills — especially in .NET, Blazor, and SQL Server — to grow as a developer and contribute more effectively to the team.

- **Long-term Goal**

Grow into higher-level roles such as Senior Developer and Tech Lead, with the goal of moving into a management position to lead teams, guide technical direction, and contribute to the overall product strategy of the organization.

WORK EXPERIENCE

Junior .NET Developer — Dec 2025 — Present

Apis Medical Joint Stock Company · Ho Chi Minh City

- Developed healthcare web applications using Blazor Web and .NET 10
- Applied the latest Microsoft technologies to build medical management software
- Participated in the full software development lifecycle in a healthcare environment

C# · .NET 10 · Blazor Web · SQL Server

Fresher .NET Developer — Jun 2024 — Dec 2025

QAS Joint Stock Company · Ho Chi Minh City

- Built fullstack healthcare management software using WinForm and Blazor
- Designed and optimized SQL queries and stored procedures for a vaccination chain system with **200+ branches**
- Handled and managed **millions of customer records**, ensuring system performance and data integrity
- Involved in the full development cycle from requirements analysis to deployment

C# · ASP.NET · Blazor · WinForm · SQL Server

Software Engineering Intern — Sep 2022 — Dec 2022

FPT Software HCM · Ho Chi Minh City

- Supported project tasks within a professional software development team
- Built an internal C# tool to help configure project settings, improving the team's workflow efficiency

C# · Internal Tool

EDUCATION

FPT University — Ho Chi Minh City

Bachelor of Engineering in Software Engineering

2019 – 2023 · GPA: 7.2 / 10

PROJECTS

CoMS — Capstone Project ↗ GitHub

A team content management system — Final year project at FPT University HCM. Built following Agile methodology using JavaScript fullstack.

JavaScript · ReactJS · Agile/Scrum

StudyWithWinform

A desktop learning application built with C# WinForm, focusing on UI/UX design and data handling.

C# · WinForm
